-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

FINAL REJECTION

1. The examiner maintains the same rejection as that of the first office action, namely:

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Loerch US Patent No. 4,632,612.

Claims 3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4 and 5 are allowable.

Applicant is referred to the first office action for the details of the rejection.

2. The newly added claim 7 is a method claim basically similar to that of apparatus claim 1, therefore claim 7 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Loerch US Patent No. 4,632,612.

3. In the amendment, applicant adds the limitation "one or a plurality of sensors" to control "one or a plurality of motors". According to the amendment, claim 1 is now cover any one of the following four different types of controls. If the prior art teaches any one of the following four types of controls, the claimed limitation is met:

- (1) one sensor controls one motor;
- (2) one sensor controls a plurality of motors;
- (3) a plurality of sensors control one motor;

(4) a plurality of sensors control a plurality of motors.

Why??? Because the alternative language "or".

The claims are rejected because Loerch teaches one sensor controls one motor.

4. Applicant's arguments have been fully considered, but they are not convincing.

Applicant argues that "Loerch does not teach using signals from a plurality of sensors for one motor, or a signal from one sensor for a plurality of motors, as recited in amended claim 1". This argument is partially true. However, claim 1 as amended also covers the conditions (1) and (4) because the language used is the alternative form "or".

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
